THROAT DISEASES, ASTHMA,

BRONCHITIS

CONSUMPTION,

No. 65 Adams Street.

THE fearful prevalence in this climate of Throat and Lung diseases, in some form or other, has been remarked again and again. Indeed, it is astonishing and alarming to ontempiate the ravages of pulmonary com plaints in our very midst, and it is asserted by many careful observers, that this class o diseases is the cause of nearly fifty per cent of the whole number of deaths,

Whether in the lecture room, the concer hall, the church, or any other popular assem bly, the same orninous and terrible sound of coughing, clearing the throat or hourseness The almost imperceptible gradation of a cold to a scated consumption is a cause of neglect of the proper remedial measures. As we look back upon the past year, how many

disease, then bronchitis, and finally con umption, and were borne to their last resting place. How many who, a few short months ago, were as full of life and hope as we now are who, by the neglect of a slight cold, are now failing day by day, and will soon fade from our sight. The degrees or stages of pul-monary diseases are so insidious that the patient fails to realize his danger till he is too near the fatal whiripoor to escape. We deem tice's grave. How terrible the awakening t the reality. Far wiser would it be to learn

the truth in sesson to avert the fate while ye the malady was in a curable stage. Let none deceive themselves, for it is truth that a neglected cold, estarrh of the head, throat disease or bronchitis, ends in consumption and death. It may be soone or later, the progress of the disease may be But, how to cure these diseases of the throat and lungs, how to cure catarrh, asthma and bronchitis, and other diseases that lead to consumption, is a most perplexing inquiry. Let the experience of others and common sense settle that matter. There was a time when all sorts of drugs and polsonous con pounds were forced into the stomach with the hope of curing such complaints; but the utter and invariable failure of this practice year after year, has led to the mise dogma that these diseases were incurable, and finally the aim of the physician, himself disheartened, was merely to palliate and smooth the passage of the poor consumptive to the tomb. Persevering inquiry led to the discovery of new and important truths. We now address the remedial agents directly to the parts diseased; and in this lies the chief secret of the coaches are, in point of elegance and remarkable success of Da. Janoue Pancost's Colonel R. J. Alcorn, in very bad the Union. The management of the parameter parameter and radical cures after road is perfectly satisfactory to the road is perfectly satisfactory to the people.
